Moving Forward – In 2017, Valeo launched Egypt's CarLab, the second globally after France, to deliver advanced automotive technology proof of concept. In 2020, Valeo inaugurated two new centers. The Smart Shared Service Center focuses on delivering the after-market digitization strategy of Valeo Services Business Group, enabling the development of data science, digital content, and technical content. The Global IS Shared Services Center that serves the Group's global information system operations, including big data management, business process automation, business intelligence & insights development services, among others.

Valeo Egypt develops 50% of the Group's software production worldwide. Valeo is not only increasing its current engineering workforce in Egypt, which had reached over 2000 engineers, but is also witnessing yet another tremendous expansion by harboring operations for all of Valeo's 5 Business Groups.

Wael Abouelmaaty, General Manager of Valeo Egypt & Group's Software Delivery Services Director
